

## **Prioritisation Criteria For Walking and Cycling Projects**

The Regional Land Transport Technical Group is responsible for recommending priorities of these projects. The following method was used for ranking walking and cycling projects.

### **Step 1**

Strategy studies and promotion activities receive a ranking BCR of 10 in accordance with Transfund's procedures. This reflects the priorities established by Transfund's National Cycling and Walking Advisory Group. Infrastructure improvement projects have no adjustment to the BCR.

### **Step 2**

The project list is sorted in order of decreasing ranked BCR. Where necessary account is taken of practical timing and/or sequencing issues.
