

**To the Greater Wellington Regional Council**

We need to move on from the Transmission Gully vs Coastal Highway debate.

Both proposals are costly, won't solve traffic problems and will destroy important landscapes. Our region deserves More Choice Please!

Option3 knows the Wellington region has fantastic potential to lead the world with innovative transport thinking. Option3 is about:

- ◆ Safety improvements on the coastal highway
- ◆ Vastly improved rail services and facilities
- ◆ Easier, safer walking and cycling
- ◆ Faster, cheaper broadband for home and business
- ◆ Smart planning to develop local economies ... and avoiding the need for big new roads.

Option3 means protection for communities and coastlines and relief from the traffic jam headache. Option3 prepares the region for rising oil prices and keeps carbon emissions down. Best of all, work can start without delay!

**WESTERN CORRIDOR:  
A BETTER SOLUTION  
WITHOUT DELAY**
