Explanation

The Council is authorised under section 149 of the Local Government Act 2002 to make bylaws managing the use of regional parks and forests, and soil conservation and river control reserves that it owns or administers. The Local Government Act 2002 also allows the Council to make bylaws for flood protection and flood control works.

This Bylaw manages activities so that these parks, forests and reserves can be used for their intended purpose without users being subject to hazard, nuisance or activities that may adversely affect their health, safety and well-being.

It provides for the protection of the natural and heritage resources, land, buildings and structures of all regional parks, forests and reserves from damage or loss through any human activity.

The operative *Regional Parks Network Management Plan*, the *Regional Forest Land Management Plan*, and individual park management plans and access plans identify activities that can be undertaken as of right without approval (allowed activities), activities that need to be managed through specific controls (managed activities), activities for which approval is required (restricted activities) and activities which may not occur in any circumstances (prohibited activities). The Bylaw ensures compliance with these management and access plans and they should be referred to when interpreting the Bylaw.

The Bylaw does not prevent or inhibit any lawful management or emergency services activity within a regional park, forest, recreation area or reserve.
