ECONOMY

The New Zealand economy in 2017

The New Zealand economy grew by 3.6% over the March 2017 year, following 3.6%pa growth the previous year.

Construction was the biggest contributor to growth, with value-added lifting just over 10%. The sector has benefited not only from higher levels of business activity, but population growth and relatively low interest rates have pushed up demand for new houses and commercial premises. However, capacity pressures have mounted.

Demand for professional services rose, with professional, scientific and technical services growing 5.1% over the March 2017 year. An aging population, coupled with strong migration flows, pushed up demand for health services. Health care and social assistance GDP increased by 6.3% over the year. Other services such as retail (5.2%), rental and hiring (3.3%), and finance (3.0%) also contributed significantly to growth.

Another record-breaking year for domestic and international visitor spending saw GDP for accommodation and food services increase 6.2%.

Value-added from agriculture, forestry and fishing slipped 0.5%, as conditions remained challenging for dairy farmers (-1.5%). Nevertheless, many other parts of the primary sector recorded growth, including forestry (4.0%), fishing and aquaculture (2.7%), poultry (4.2%), and horticulture and fruit growing (1.2%).

How fast has Wellington Region's economy grown?

This section measures economic performance in Wellington Region during the year to March 2017 and previous years. All GDP estimates are measured in constant 2010 prices.

- GDP in Wellington Region measured \$31,289m in the year to March 2017, up 2.5% from a year earlier. New Zealand's GDP increased by 3.6% over the same period.
- Economic growth in Wellington Region averaged 1.6%pa over the last 10 years compared with an average of 2.0%pa in the national economy.
- Growth in Wellington Region reached a high of 3.8% in 2007 and a low of -0.3% in 2012.
- Wellington Region accounted for 13.3% of national GDP in 2017.

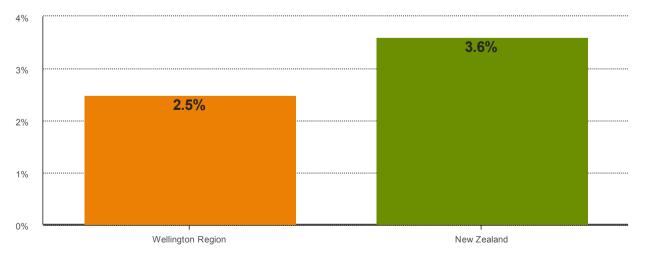

Figure 1: GDP growth (year to Mar 2017)

Figure 3: GDP growth over various time periods

What is the industrial structure of Wellington Region's economy?

This section describes the structure of the economy in terms of the broad sectors: primary, secondary, tertiary and quaternary. The primary sector makes direct use of natural resources. It extracts or harvests products from the earth. The secondary sector produces manufactured and other processed goods. The tertiary sector includes the lower value-adding service industries while the quaternary sector includes the higher value-adding, knowledge-based service industries. A full definition of the sectors is given in the technical appendix.

Figure 4: Share of total GDP (2017)

- Primary industries accounted for the smallest proportion in Wellington Region: 1.0% compared with 6.8% in the national economy.
- Secondary industries accounted for 15.1% compared with 19.1% in the national economy.
- Tertiary industries accounted for 22.7% compared with 28.7% in the national economy.
- Quarternary industries accounted for the largest proportion of GDP (48.2%) in Wellington Region, which is higher than in the national economy (31.6%).

Wellington Region Annual Economic Profile 2017

- Among broad industries Public Administration and Safety was the largest in Wellington Region in 2017 accounting for 11.7% of total.
- The second largest was Professional, Scientific and Technical Services (11.7%) followed by Financial and Insurance Services (9.0%)

Figure 5: Share of total GDP (2017)

5

The table on the following page shows 54 industries ranked according to their contribution to GDP. These industry categories are used by Statistics New Zealand in the national accounts. They are a mix of various levels of industries on the ANZSIC-06 classification. Further information about the industrial classification is given in the Technical Notes at the end of the document.

- Among detailed industries Professional, Scientific & Tech Services was the largest in Wellington Region in 2017 accounting for 11.7% of total.
- The second largest was Central Gov Admin, Defence & Safety (11.1%) followed by Finance (6.6%)

Which broad industries made the largest contribution to economic growth?

Although an industry may be growing rapidly, if it is small relative to a region's total economy its contribution to overall GDP growth may also be small. This section therefore investigates which broad industries made the largest contribution to the overall growth of Wellington Region's economy taking into account their relative sizes.

- Professional, Scientific and Technical Services made the largest contribution to overall growth in Wellington Region between 2016 and 2017. The industry grew by 4.2% over the year and contributed 0.48 percentage points to the district's total growth of 2.5%.
- The next largest contributor was construction (0.40 percentage points) followed by health care and social assistance (0.38 percentage points).
- The largest detractor from growth over the year was Information Media and Telecommunications which declined by 3.6% and contributed -0.24 percentage points to the total growth of 2.5%. Transport, Postal and Warehousing (-0.11 percentage points) was the next largest detractor.

Table 3: 1-digit industries ranked by % point contribution to GDP growth

	Industry	2016	2017	% point contribution to growth	Annual Growth

10

In which industries does Wellington Region have a comparative advantage?

A high concentration of certain industries in a region may be indicative of that region having a comparative advantage in those industries. This may be due to its natural endowments, location, skills of its labour force or other reasons. The location quotient indicates in which industries a region has comparative advantage. A region has a location quotient larger (smaller) than one when the share of that industry in the regional economy is greater (less) than the share of the same industry in the national economy.

The following table shows a ranking of 54 industries by their location quotients.

• The industries in which Wellington Region has the largest comparative advantages are Petroleum & Coal Product Manufacturing (location quotient = 3.6), Central Gov Admin, Defence & Safety (3.0), and Finance (1.8).

Table 5: Location Quotient 2017

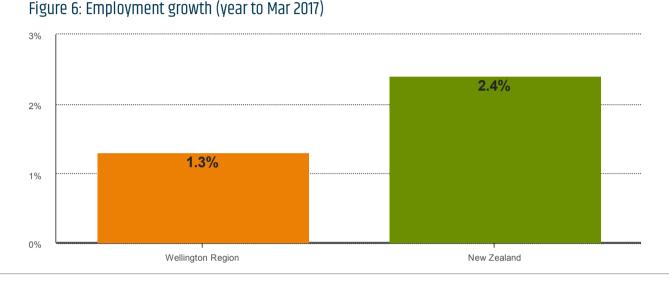

11

	Wellington	New Zealand

EMPLOYMENT

How fast has employment grown in Wellington Region?

Employment growth provides new opportunities for the region's population to earn income and contribute to the region's economy. This section contrasts Wellington Region's recent performance in creating jobs with other regions in the country.

- Total employment in Wellington Region averaged 277,966 in the year to March 2017, up 1.3% from a year earlier. Employment in New Zealand increased by 2.4% over the same period.
- Employment growth in Wellington Region averaged 0.7%pa over the last 10 years compared with 1.2%pa in the national economy.
- Employment growth in Wellington Region reached a high of 3.2% in 2005 and a low of -1.5% in 2010.

Figure 8: Employment growth over various time periods

What is the industrial structure of employment in Wellington Region?

This section describes the structure of the labour market in terms of the primary, secondary, tertiary and quaternary categories and the industries that fall within these categories. The primary sector makes direct use of natural resources. It extracts or harvests products from the earth. The secondary sector produces manufactured and other processed goods. The tertiary sector produces manufactured and other processed goods. The tertiary sector produces while the quaternary sector includes the lower value-adding service industries while the quaternary sector includes the higher value-adding, knowledge-based service industries. A list of industries making up the quaternary sector is given in the technical appendix.

Figure 9: Employment by broad sector (2017)

- Primary accounted for 1.7% in Wellington Region compared with 6.1% in New Zealand.
- Secondary accounted for 13.2% in Wellington Region compared with 19.5% in New Zealand.
- Tertiary accounted for 34.1% in Wellington Region compared with 38.2% in New Zealand.
- Quarternary industries accounted for the largest proportion of employment (51.1%) in Wellington Region, which is higher than in New Zealand (36.3%).

15

Which are the largest employing industries in Wellington Region?

This section identifies the broad industries that make the largest contribution to employment in Wellington Region.

Table 6: 1-digit industries ranked by size of employment (2017)

		Welling	ton Region	New 2	Zealand
	Industry	Level	Share of total	Level	Share of total

What proportion of the workforce is self-employed in Wellington Region?

Self-employment makes up a sizeable proportion of total employment in New Zealand although it declined through the economic boom years and stabilised since the recession. This section contrasts self-employment in Wellington Region with the national economy.

- Self-employed workers accounted for 15.0% of the workforce in Wellington Region in 2017, which was a lower rate than in the national economy (16.4%)
- A total of 41,784.0 workers were self-employed in Wellington Region in 2017.

Figure 11: Self employment rate

PRODUCTIVITY

Productivity is a way of describing the efficiency of production. In this section, we investigate GDP per employee to determine how much economic activity is generated on average by each employee. When looking at this indicator, one needs to consider that labour is only one input into production. As a result, a comparison of a region's labour productivity growth to its own history or to other districts, implicitly assumes that each worker has the same access to machinery, technology, and land.

This section describes Wellington Region's productivity level during the year to March 2017 and previous years. Productivity is measured by GDP per employee (in constant 2010 prices).

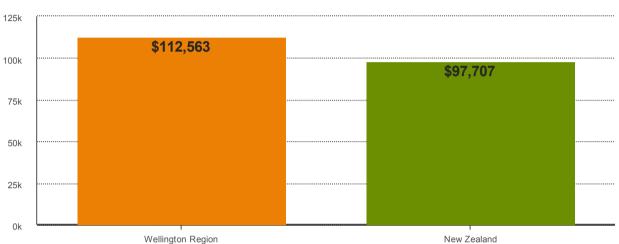

Figure 12: Productivity 2017

- GDP per employee in Wellington Region measured \$112,563 in the year to March 2017, which was 15% higher than in New Zealand.
- Productivity in Wellington Region increased by 1.2% from a year earlier compared with an increase of 1.2% in New Zealand).
- Productivity growth in Wellington Region averaged 0.9%pa over the last ten years compared with an average of 0.9%pa in New Zealand.

Figure 13: Productivity growth

22

What are the most productive industries in Wellington Region

This section ranks industries according to their level of GDP per employee in Wellington Region. The level of GDP per employee may differ between industries because of the skill levels of workers and their inherent efficiency, as well as due to different amounts of machinery, technology, and land being used as production inputs. Table 17 below ranks broad industries by GDP per employee in Wellington Region and shows the corresponding GDP per employee in the national economy. Since the capital intensity of industries is often a significant explainer of productivity we also show the capital intensity of each industry in the table. Capital intensity is measured as the share of GDP which is attributable to capital. Industries with a high proportion are thus highly capital intensive.

Table 11: 1-digit industries ranked by productivity (2017)

		Productivit	ty	Capital intensity
	Industry	Wellington Region	New Zealand	New Zealand
Electricity, Gas, Water and Waste Services		539,807	436,006	0.80

BUSINESS GROWTH

How fast did the number of business units grow in Wellington Region?

Growth in the number of business units is an indicator of entrepreneurial activity. It indicates an environment in which entrepreneurs are prepared to take risks to start new ventures. This section contrasts Wellington Region's recent performance in business unit growth with other regions in the country.

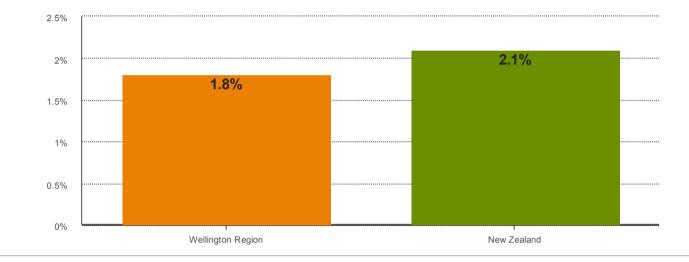

Figure 14: Business unit growth (year to Mar 2017)

- A total of 55,698 business units were recorded in Wellington Region in 2017, up 1.8% from a year earlier.
- The number of business units in New Zealand increased by 2.1% over the same period.
- Growth in the number of business units in Wellington Region averaged 0.9%pa over the past 10 years compared with 1.1%pa in the national economy.
- Business unit growth in Wellington Region varied from a high of 7.8% in 2004 to a low of -1.8% in 2001.

POPULATION GROWTH

How fast has Wellington Region's population grown?

Population growth is an indicator of a region's attractiveness as a place to live and work. A strong regional economy with plentiful job opportunities will help a region retain its population and attract new residents from other regions and abroad. This section contrasts Wellington Region's recent population growth with other districts and the country as a whole.

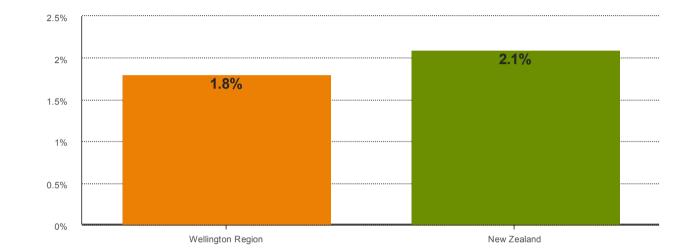

Figure 16: Population growth (year to Jun 2017)

- Wellington Region's population was 513,900 in 2017, up 1.8% from a year earlier. New Zealand's total population grew by 2.1% over the same period.
- Population growth in Wellington Region averaged 1.2%pa over the last 5 years compared with 1.7%pa in New Zealand.
- Since 2000 growth in Wellington Region reached a high of 1.8%pa in 2017 and a low of 0.3%pa in 2013.

27

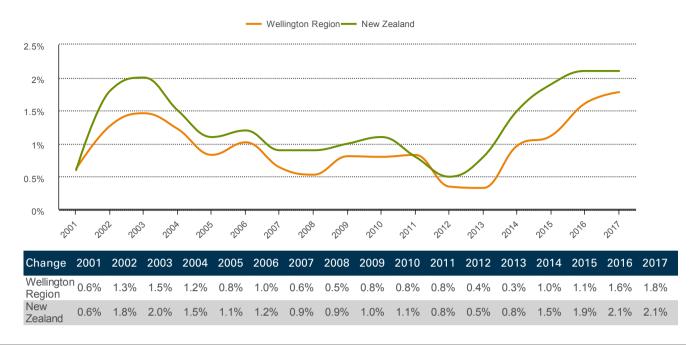

Figure 18: Population growth last 1,2,3 and 5 years

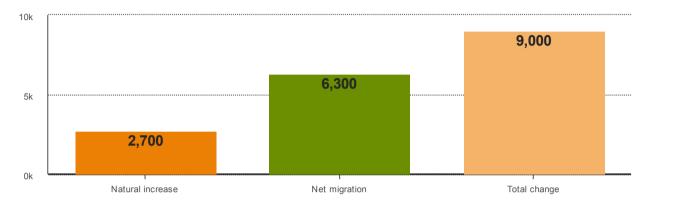

What is the source of Wellington Region's population growth?

A region's population can grow through natural growth (births less deaths) and net migration (arrivals less departures). This section describes the relative contributions of these two sources to pupulation growth in Wellington Region.

• Wellington Region's population increased by 9,000 people in the year to June 2017. This net increase was made up of net migration of 6,300 and natural increase of 2,700.

What is the age structure of Wellington Region's population?

- In 2017, 67.2% of Wellington Region's population was of working age (15-64). This was significantly higher than the proportion of the national population (65.4%).
- Wellington Region had a slightly lower proportion (18.5%) of young people (0-14) than the country as a whole (19.5%) and a significantly lower proportion (14.2%) of people 65 years and older compared with New Zealand (15.1%).
- Overall the dependency ratio in Wellington Region (48.7%) was lower than in the national economy (52.8%). The dependency ratio expresses the number of persons outside of the working age as a proportion of the number of persons of working age (15 to 64 years).

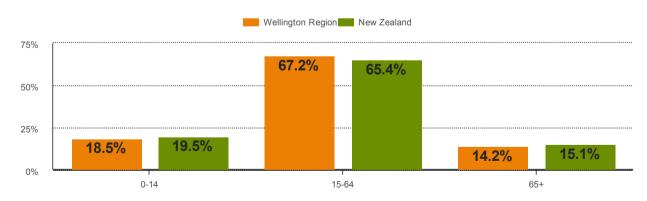

Figure 20: Age composition of the population (year to June 2017)

STANDARD OF LIVING

This section describes a few indicators of economic standard of living. It investigates average earnings, house prices and housing affordability. Note that due to data constraints earnings data are provided for the year to March 2016.

What are the mean earnings in Wellington Region?

Income earned in the labour market is an important source of household income. This section contrasts Wellington Region's mean annual earnings with the country as a whole.

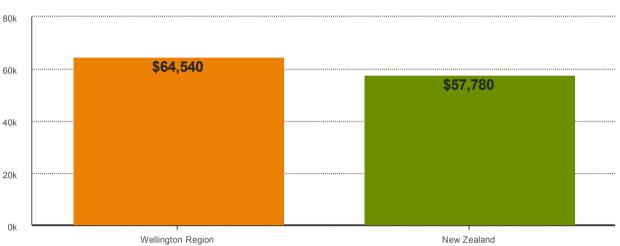

Figure 21: Earnings, 2016

• Mean annual earnings in Wellington Region was \$64,540 in the year to March 2016, which was higher than the New Zealand mean of \$57,780.

- Mean earnings in Wellington Region increased by 3.5% over the year to March 2016 compared with an increase of 3.1% in New Zealand.
- Over the last ten years earnings growth in Wellington Region reached a maximum of 5.2% in 2008 and a minimum of 1.4% in 2001.

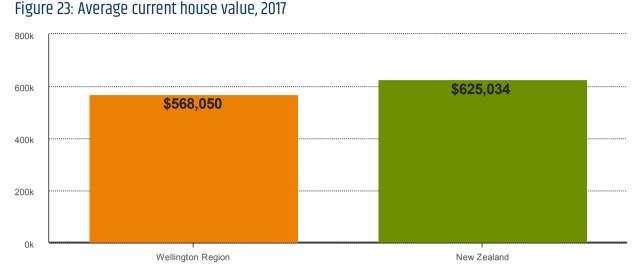

Figure 22: Annual earnings growth

- Mean annual earnings in Wellington Region was \$64,540 in the year to March 2016, which was higher than the New Zealand mean of \$57,780.
- Mean earnings in Wellington Region increased by 3.5% over the year to March 2016 compared with an increase of 3.1% in New Zealand.
- Over the last ten years earnings growth in Wellington Region reached a maximum of 5.2% in 2008 and a minimum of 1.4% in 2001.

How do house prices in Wellington Region compare?

The cost of housing is a major component of household spending. This section describes the cost of housing in Wellington Region relative to the rest of the country.

- The Average current house value in Wellington Region was \$568,050 in 2017, which was lower than the New Zealand median of \$625,034.
- House price growth in Wellington Region was 20% for the year to March 2017. Growth was stronger that in New Zealand (13%).

Figure 24: Annual Average current house value growth

How affordable is housing in Wellington Region?

This section investigates the affordability of housing by comparing Average current house values with average earnings. We have estimated a housing affordability index which is the ratio of the Average current house value to annual average earnings measured in the Linked Employer Employee Data. A higher ratio therefore indicates lower housing affordability.

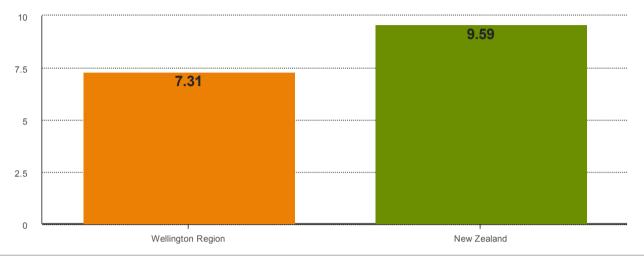

Figure 25: Housing affordibility index 2016

• The housing affordability index in Wellington Region was 7.3 in the year to March 2016, which was lower than New Zealand's index of 9.6. This means that housing is more affordable in Wellington Region than in New Zealand.

Figure 26: Housing affordibility

WORKFORCE AND SKILLS

How do skill levels in Wellington Region compare with New Zealand?

A region that can offer high skilled jobs can generally offer a higher standard of living to its residents. It is also has a better chance of retaining its residents and attracting new skills. This section contrasts the skill levels required by jobs in Wellington Region with those required in the national economy. The broad skill categories used are defined in the technical section at the end of the report.

Table 12: Employment by broad skill level 2017

Skill level		Wellington Region	New Zealan	ld
Skill level	Jobs	% of total	Jobs	% of total
Highly-skilled	112,331	40.4%	802,782	33.3%
Skilled	32,567	11.7%	267,788	11.1%
Semi-skilled	39,747	14.3%	421,918	17.5%
Low-skilled	93,321	33.6%	917,673	38.1%
Total	277,966	100%	2,410,161	100%

- Approximately 40% of Wellington Region's workforce was employed in highly skilled occupations in 2017. This is higher than in New Zealand (33%).
- Approximately 34% of Wellington Region's workforce was employed in low-skilled occupations in 2017. This is lower than in New Zealand 38%.

Figure 27: Employment by broad skill level, 2017

What is the occupational structure of employment in Wellington Region?

This section describes the types of occupations that are employed in Wellington Region. The following graph shows the distribution of employment across broad occupational categories (1-digit occupations).

- Professionals accounted for the largest share of employment (30%) in Wellington Region, which is higher than New Zealand (24%).
- Managers accounted for the second largest share of employment (16%) in Wellington Region, which is lower than New Zealand (18%).
- Machinery operators and drivers accounted for the lowest share of employment (16%) in Wellington Region, which is lower than New Zealand (18%).

Employment in knowledge intensive industries in Wellington Region

Knowledge intensive industries are those in which the generation and exploitation of knowledge play the predominant part in the creation of wealth. These sectors represent an increasing share of the New Zealand economy's output and employment, and will most likely be the source of the future productivity growth.

An industry is defined as knowledge-intensive if it meets two criteria: at least 25 per cent of the workforce is qualified to degree level and at least 30 per cent of the workforce is in professional, managerial and scientific and technical occupations. Further details of the definition are providing in the technical notes at the end of the report.

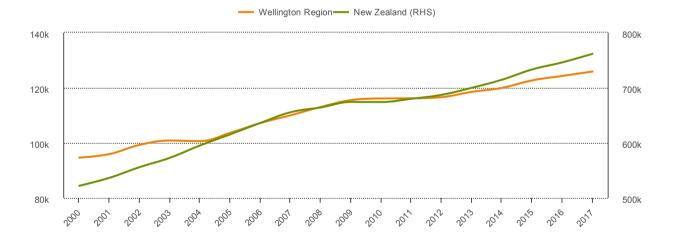

This section describes employment in knowledge intensive industries in Wellington Region.

Table 14: Employment in knowledge intensive industries (2017)

	Employment in KI industries 2017	KI employment as share of total employment 2017	Annual growth in Kl employment 2017	Annual average grwoth in Kl employment 2007-2017
Wellington Region	125,918	45%	1.3%	1.4%
New Zealand	761,730	32%	2.1%	1.5%

- During 2017, there were 125,918 jobs in Wellington Region's knowledge intensive industries. At 45% of total employment, this was higher than in New Zealand (32%).
- During the year March 2017, growth in employment in knowledge intensive industries was 1.3%, compared with a change of 2.1% in New Zealand.

Which qualifications are in demand in Wellington Region?

This section examines the types of qualifications, in terms of NZQA level and field of study, that are in demand in Wellington Region. The demand for qualifications is derived from our estimates of the demand for occupations by using assumptions about the types of qualifications which are ideally required for each occupation. Thus our estimates do not describe the educational profile of the region's workforce but rather the type of qualifications that are ideally required in the region. Further details are provided in the technical notes at the end.

- The number of positions in Wellington Region requiring a Degree (level 7+) increased by 20,540 between 2007 and 2017, ranking it as the qualification level with the largest absolute increase in demand.
- By field of study, Health experienced the highest increase in demand between 2007 and 2017. The number of positions requiring this field of study increased by 3,569 over the 10 year period.

TOURISM

Tourism has grown rapidly in New Zealand since 2000. Not only has the number of overseas tourist arrivals increased substantially, but the level of domestic tourism has also expanded rapidly as spending on leisure by New Zealand residents increased. This section describes the contribution of tourism to Wellington Region's economy.

Tourism GDP

Table 18: Tourism GDP (2001-2017)

	Wellington Regio	n	New Zealand	
Year	Level	Change	Level	Change
2000	\$629m		\$5,714m	
2001	\$645m	2.6%	\$5,970m	4.5%
2002	\$686m	6.4%	\$6,512m	9.1%
2003	\$764m	11.4%	\$7,492m	15.1%
2004	\$804m	5.1%	\$8,055m	7.5%
2005	\$858m	6.8%	\$8,555m	6.2%
2006	\$907m	5.7%	\$8,925m	4.3%
2007	\$965m	6.4%	\$9,284m	4.0%
2008	\$1,034m	7.1%	\$9,936m	7.0%
2009	\$996m	-3.7%	\$9,540m	-4.0%
2010	\$1,011m	1.5%	\$9,582m	0.4%
2011	\$1,015m	0.4%	\$9,503m	-0.8%
2012	\$1,048m	3.3%	\$9,635m	1.4%
2013	\$1,037m	-1.1%	\$9,896m	2.7%
2014	\$1,053m	1.5%	\$10,032m	1.4%
2015	\$1,156m	9.7%	\$11,518m	14.8%
2016	\$1,308m	13.2%	\$12,978m	12.7%
2017	\$1,278m	-2.3%	\$12,930m	-0.4%

Figure 30: Annual average tourism GDP growth (2001-2017)

Wellington Region Annual Economic Profile 2017

- The tourism industry contributed \$1,278m towards GDP in Wellington Region in 2017. This amounted to 4.1% of the Wellington Region's economic output in 2017, up from 3.6% ten years ago.
- Economic output in Wellington Region's tourism industry declined by -2.3% in 2017, compared with a 0.4% decline in New Zealand.
- Growth in the industry in Wellington Region has averaged 2.8% over the last ten years, compared with 3.4% in New Zealand.

Tourism Employment

41

Table 19: Tourism employment (2001-2017)

	Wellington Regi	on	New Zealand	
Year	Level	Change	Level	Change
2000	17,365		153,942	
2001	17,566	1.2%	158,751	3.1%
2002	17,722	0.9%	163,440	3.0%
2003	18,031	1.7%	171,423	4.9%
2004	18,643	3.4%	179,373	4.6%
2005	19,562	4.9%	186,321	3.9%
2006	20,425	4.4%	192,507	3.3%
2007	21,621	5.9%	198,687	3.2%
2008	21,789	0.8%	199,935	0.6%
2009	21,881	0.4%	200,445	0.3%
2010	20,993	-4.1%	188,727	-5.8%
2011	20,371	-3.0%	183,330	-2.9%
2012	20,151	-1.1%	176,985	-3.5%
2013	18,730	-7.1%	174,762	-1.3%
2014	18,881	0.8%	176,043	0.7%
2015	19,757	4.6%	192,504	9.4%
2016	22,026	11.5%	211,089	9.7%
2017	23,644	7.3%	230,793	9.3%

Figure 31: Annual average tourism employment growth (2001-2017)

- The tourism industry employed an average of 23,644 people in Wellington Region in 2017. This amounted to 8.5% of the Wellington Region's total employment in 2017, up from 8.4% in 2007.
- Employment growth in the industry in New Zealand has averaged 0.9% over the last ten years, compared with 1.5% in New Zealand.
- Employment in the tourism industry increased by 7.3% in 2017, compared with a 9.3% increase in New Zealand.

TECHNICAL NOTES

Time period

This economic profile reports on March years (eg. 2017 refers to the 12 months to March 2017) for all indicators except population (as at June), dairy sector statistics (May year), and government social service expenditure and beneficiary data (June years).

Gross Domestic Product

Gross Domestic Product (GDP) measures the value economic units add to their inputs. It should not be confused with revenue or turnover. A company's value adding is broadly equivalent to its sales revenue less the cost of materials (eg steel for making motor cars) and services (eg telecommunications) purchased from other firms.

Total GDP is calculated by summing the value added to all goods and services for final consumption – i.e. it does not include the value added to goods and services used as intermediate inputs for the production of other goods as this would result in double counting. As a result, GDP estimates should not be confused with revenue/turnover/gross output.

In this profile Gross Domestic Product for each region and territorial authority (TA) is estimated by Infometrics. A top down approach breaks national production-based GDP (published by Statistics New Zealand) down to territorial authority level by applying TA shares to the national total. Each TA's share of industry output is based on the share of earnings measured in the Linked Employer Employee Data (LEED), which is, in turn, based on taxation data. This approach captures differences in productivity between TAs and changes in productivity over time. Our estimates are benchmarked on regional GDP published by Statistics New Zealand

GDP is measured in constant 2010 prices .

Prices

In this profile, we present all GDP estimates in constant 2010 prices. GDP presented in constant prices is sometimes referred to as real GDP. By using constant prices we remove the distractionary effect of inflation. It enables us to meaningfully compare GDP from one year to the next.

Industrial classification

This profile uses industry categories from the 2006 Australia New Zealand Standard Industrial Classification (ANZSIC). The ANZSIC is a hierarchical classification with four levels, namely divisions (the broadest level also referred to as 1-digit categories), subdivisions (3-digit), groups (4-digit) and classes (7-digit). There are approximately 500 7-digit industries.

This profile also uses a grouping of 54 industries. These are the industries used by Statistics New Zealand in the national accounts.

Unallocated

Unallocated items include taxes levied on the purchaser rather than the producing industry (such as GST, import duties, and taxes on capital transactions), and items that cannot easily be allocated to a specific industry (such as the seasonal adjustment balancing item). A seasonal adjustment balancing item is necessary to ensure that the sum of all seasonally adjusted industries can be reconciled with total GDP.

Broad economic sectors

The primary sector extracts or harvests products from the earth and includes agriculture, forestry, fishing, and mining. The secondary sector produces manufactured and other processed goods and includes manufacturing, electricity, gas and water, and construction. The tertiary sector includes all service industries that are not knowledge intensive, such as retail trade, and food and accommodation services. The quaternary sector includes knowledge **intensive** service industries. 'Other' includes owner occupied property operation and **unallocated** activity.

Employment by industry

Employment is measured as an average of the four quarters making up each year. The unit of measurement is filled jobs.

Regional employment numbers are from Infometrics' Regional Industry Employment Model (RIEM). The model draws heavily on quarterly and annual Linked Employer Employee Data (LEED) published by Statistics New Zealand. RIEM differs from data from Business Demography in that it is a quarterly series (BD is annual) and it includes both employees and self-employed, whereas BD only includes employees.

Self-employment

Self-employment rates are from Annual Linked Employer Employee Data (LEED).

Employment by occupation

Employment in each industry is converted to occupational employment using the relationship between industry and occupational employment observed in various Population Censuses. The Population Census measures the occupational composition of employment in each industry and how this changes over time. Occupations confirm to the categories used in the Australian New Zealand Standard Classification of Occupations (ANZSCO).

Productivity

Productivity measures the efficiency of production. In this profile, we measure productivity as GDP per filled job (ie. The amount of economic activity generated on average by each filled job). One needs to be aware that labour is only one input into production. The output of each employee may differ across industries in a region due to differing access to machinery, technology, and land. Therefore, productivity comparisons should only be made in circumstances where it is reasonable to assume that capital intensity will be broadly the same – for example, when looking at productivity within an industry over a limited-time period, or when comparing productivity of a particular industry with that same industry in another region.

Earnings

Earnings data comes from the quarterly Linked Employer Employee Data published by Statistics New Zealand. LEED publishes the mean earnings of full quarter jobs for each quarter. Full quarter jobs may include full time and part time jobs. Earnings include overtime and lump sum payments. We sum the mean earnings for the four quarters making up the year to arrive at an estimate of average annual earnings.

House prices

House value (dollar value) are sourced from QVNZ. The levels used are average current values. An average current value is the average (mean) value of all developed residential properties in the area based on the latest house value index from QVNZ. It is not an average or median sales price, as both of those figures only measure what happens to have sold in the period. These average current values are affected by the underlying value of houses (including those not on the market) and are quality adjusted based on the growth in each house's price between sales.

Population

The estimated resident population is an estimate of all people who usually live in that area at a given date. Visitors from elsewhere in New Zealand or from overseas are excluded.

The estimated resident population at 30 June 2013 is based on the 2013 census usually resident population count, adjusted for:

- net census undercount (based on the 2013 Post-enumeration Survey)
- · residents temporarily overseas on census night
- births, deaths, and net migration between census night and the date of the estimate
- reconciliation with demographic estimates at ages 0–9 years.

The estimated resident population is not directly comparable with the census usually resident population count because of these adjustments.

The estimated resident population is sourced from Statistics New Zealand.

Dependency ratio

The dependency ratio is the number of under 15 year olds and over 65 year olds as a ratio of the rest of the population (working age).

Business Units

Data on the number of businesses is sourced from the Business Demography statistics from Statistics New Zealand. Businesses are measured by geographic units, which represent a business location engaged in one, or predominantly one, kind of economic activity at a single physical site or base (eg. a factory, a farm, a shop, an office, etc). All non-trading or dormant enterprises, as well as enterprises outside of New Zealand, are excluded from business demography statistics.

A significant number of enterprises are recorded as having zero employment. Enterprises in the zero employee count size category may have:

- · working owners who don't draw a wage from their business
- · labour provided by other businesses or contractors
- business activity that requires no labour (eg. holding company).

Only business units that are economically significant enterprises are included. To be regarded as economically significant they must meet at least one of the following criteria:

- annual expenses or sales subject to GST of more than \$30,000
- 12-month rolling mean employee count of greater than three
- part of a group of enterprises
- · registered for GST and involved in agriculture or forestry
- over \$40,000 of income recorded in the IR10 annual tax return (this includes some units in residential property leasing and rental).
