Building community resilience against flood risks – follow up

Thank you for meeting us on 10 October 2022.

As noted in our follow-up letter, we promised to send you details about your co-investment in a second tranche of 92 co-funded flood protection projects. We now provide that information, which comes in two formats: an executive summary (attached) and a full [report](#), which we believe provides a very strong case for co-investment with the regional sector.

The full report will also be forwarded to you in hard copy.

Te Uru Kahika views this tranche of projects as critical in buying enough time to develop necessary longer-term PARA / Te Mana O Te Wai and resource management legislative solutions to address NZ's increasing flood risk problem. This co-investment will also sustain the pipeline and systems set up as part of the current 55-project Covid-19 recovery programme.

We look forward to providing you with any additional information you may require in the New Year.

Meri Kirihimete

Doug Leeder
Daran Ponter
