## Wallace St bus stop safety improvement

Over recent months Greater Wellington (GW) has been made aware of ongoing community concerns around the safety of this bus stop. Despite some tactical improvements being implemented at the site, community feedback indicates their concerns have not been effectively addressed.

GW is aware that this section of road is identified among the first tranche of projects in the LGWM City Streets programme and we support the high priority given to this work.

Mindful that there are safety improvements occurring across the city, please would you provide me with an overview of the prioritisation process for the work in the City Streets programme so we can gauge the relative priority of improvements at this bus stop. We would also appreciate your advice on how we can proactively input to the process so we can incorporate the concerns and perspectives of our communities and patrons into works prioritisation.

Thank you for your support in this matter and I look forward to receiving this information.

Ngā mihi
